

## **CONSTRUCTION ALERT**

### **SEPULVEDA BOULEVARD WIDENING PROJECT, P-881**

#### **City of Culver City**

#### **The Project:**

This project will provide for three (3) continuous lanes in the southbound direction along Sepulveda Boulevard between Sawtelle Boulevard and Green Valley Circle. Currently, within the project limits, there are three (3) travel lanes northbound and two (2) travel lanes southbound.

- Between Green Valley Circle and Jefferson Boulevard/Playa Street:

This is where most of the construction work will happen. The proposed work includes street pavement reconstruction, landscape median modification, traffic signal modification, utility relocation and other miscellaneous improvements. Street reconstruction will extend approximately 200 feet on Playa Street/Jefferson Boulevard, Slauson Avenue, and Green Valley Circle. The entire street will be reconstructed with long lasting concrete street pavement.

- Between Playa Street/Jefferson Boulevard and Sawtelle Avenue (Sepulveda Bl. southbound only):

Sepulveda Boulevard southbound will be re-striped and on street parking prohibited. Between Sawtelle Boulevard and Berryman Avenue, only afternoon period peak hour on street parking (between 3pm and 7pm) will be prohibited.

There is no change in lane or on street parking in the northbound direction.

#### **When:**

The project is scheduled to begin construction on Monday, May 9, 2011 and expected to be completed by November 2011.

#### **The construction sequence:**

The project will be constructed in phases to allow portions of Sepulveda Bl. street to be open during construction. As necessitated by construction activity, there will be through lane and turning movement restrictions that occur throughout the term of the project. At times there will be only one lane of traffic open in each direction. At other times there

will be two lanes of traffic open in one direction and one lane in the other. Commuters are strongly encouraged to use alternate routes during the construction duration.

In order to expedite the construction, construction is allowed to occur between 6 am and 10 pm, seven days a week. However, at certain days, between Green Valley Circle and Jefferson Boulevard/Playa Street, there will be occasional night work between 10pm and 6am.

All business access will be maintained during normal business hours.

Please do not enter the construction work zone and obey all posted construction signs.

**The traffic updates and contact information:**

Staff will post project updates and traffic advisory information on City's website, in local newspapers, AM 1690 radio and City's e-mail notification system.

If you have any questions or concerns about this project during construction, please call the project information hotline at 562.463.4468. Calls will be answered by a machine 24 hours a day. All calls received will be responded to within 24 hrs. Please be sure that you leave your daytime contact information and name.
