This is to advise you that construction of Culver Boulevard between Sepulveda Boulevard and Elenda Street will be switching to the next major phase of the work. On Tuesday, June 8, 2021, the contractor will be changing traffic control on Culver Boulevard from the current south side of the new median islands to the north side of the islands.

Once this traffic control switch occurs, the contractor will begin work on removing and replacing the sidewalks along the south side of Culver Blvd., followed by the new paver parking area, and streetlights. This work is scheduled to take place during the months of June, July, and August 2021. The overall project is scheduled to be completed in October 2021.

While the contractor is working on these improvements, there will be sections of extended “No Parking” along the south side of Culver Blvd. To assist the residents that park in this area, a limited amount of parking will be available along the newly constructed median islands. All cars should travel and park in the northeast bound direction. An example is shown below and the contractor will be posting signage to assist with access. Please work with the contractor and contact the inspector if you have any questions. Additional noticing will be provided for driveways affected by construction.

Additional project information and updates will be available at: https://www.culvercity.org/CulverProject
If this notice is delivered to a multi-unit complex, we request the manager notify all occupants personally or via conspicuous posting in the mail delivery area.

Please direct all inquiries or concerns to the onsite Construction Inspector or Construction Manager noted below.
