

# Welcome to the Ballona Creek Revitalization Project Task Force survey!

## Summary of Results

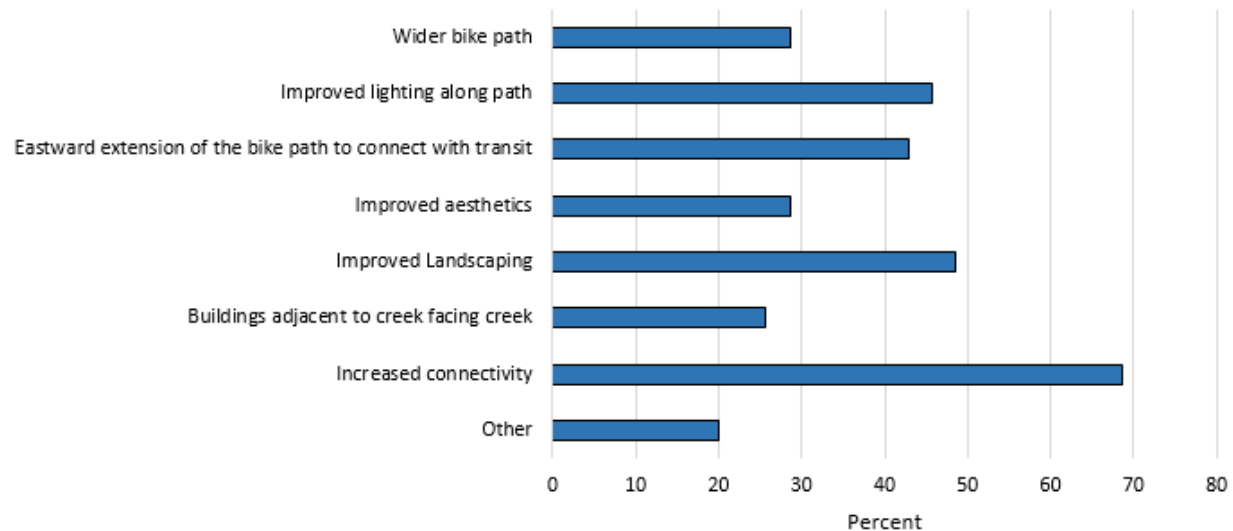

**Question 1:** What mode do you typically use through the Ballona Creek Bike Path?

**Question 2:** How do you use the Ballona Creek Bike Path?

**Question 3:** What would make you use the Ballona Creek Bike Path more?  
(Select top three)

**Question 4:** What first step would you like to see accomplished in the Ballona Creek Revitalization Project?

- Connectivity
  - Increase connections to transit
  - Implement an extension of the path eastward
- Access
  - Create more access; e.g., open more gates like Jackson Gate
- Nature/open space
  - Implement habitat restoration
  - Create more rain gardens
  - Enhance landscaping
- Water quality
  - Implement more water quality projects
  - Use native plants and wetlands to improve water quality
  - Expand storm water management
- Improve lighting and wayfinding
- Widen the existing pathway

**Question 5:** For you to consider the Ballona Creek Revitalization Project a success, what is the most important thing it must achieve?

- Improved connectivity, access, mobility
- Open space and landscape improvements
- Enhanced ecology and biodiversity
- Lighting, safety infrastructure
- Awareness, education programming
- Storm water diversion
- Increased water quality

**Question 6:** How would you sum up what Ballona Creek means to you in one word or phrase?

- Community, family, safe
- Important, controversial
- Needs public education
- Recreation, open space, water, sky, grounding, and reflection
- Great asset needing cleanup and more use, improve habitat and ecology
- Underrated stepsister of the LA River, underappreciated, underutilized
- Mobility
  - Connected/connection/connective tissue/connecting our city
  - Beautiful bicycle freeway providing alternative transportation
  - Improved transportation opportunities
  - Safest and healthiest path of travel for anyone on a bike or skateboard from Culver City to the Beach or vice versa
- Storm water
  - Impressive in a storm!
  - A great opportunity to look differently at how we manage water and watersheds, like capturing storm water for beneficial uses, as the value of Ballona Creek has not been recognized as it should have been
- Limitless potential, hidden gem of the city with so much potential to be transformed into a significant green infrastructure for all. Currently concrete flood control channel, future could be a natural beautiful river in the heart of Culver City.
- Living history/heritage has taken a natural meandering waterway to swim, or boat on, with natural edible vegetation at the edge to a known route where many can appreciate an early perspective of our history, which can serve us today!

**Question 7:** What is the most important outcome that the upcoming task force meeting should achieve?

- Identify goals
  - Consensus on a place to start
  - Clear short and long term project goals and prioritization
  - Action plan from discussion
- Timeline of next steps
  - Potentially forming sub-committees if multiple tasks are identified
  - List of projects and programs, budgeting, funding mechanisms, identified partnerships
- Inclusiveness
  - Respect for Tongva
  - Get everybody to the table and talking

**Question 8:** We are in the process of drafting an action statement for the Ballona Creek Revitalization Project. How do you view the mission of the project? What do you believe this statement should include?

- Environment
  - Native flora
  - Health of watershed
  - Ecosystem services
  - Resiliency
  - Connected to nature
- Connectivity
  - Safety
  - Public transportation
- Storm water
  - Water quality enhancements
  - Pollutant removal
- Aesthetic
  - Public art
- Recreation
  - Cycling
  - Open space
  - Buildings facing creek
- Education
  - Involvement from the community
