For the purpose of compliance with Government Code subsection 66001(d), the following information regarding AB 1600 fees is presented:

Every fifth year the local agency shall make all of the following findings with respect to that portion of the account or fund remaining unexpended, whether committed or uncommitted:

**(A)** Identify the purpose to which the fee is to be put.

The purpose of this fee is to mitigate the impact of development activity and ensure that the public interest requisite of three acres of community parks or recreational facilities for each 1,000 persons within the City is maintained. The fees shall be used solely for the acquisition of new and rehabilitation of existing community parks and recreation facilities.

**Residential Development Park Dedication and In-Lieu Fee**

**(B)** Demonstrate a reasonable relationship between the fee and the purpose for which it is charged

The City and other governmental agencies have conducted numerous studies which indicate the nature and cost of the burden and impact placed on City facilities by new residential development. These studies and other information show a certainty that new residential development generates additional impact upon the demand for the public parks infrastructure, and so long as new development continues to occur, the functional nexus between development and these impacts and demands upon the public park infrastructure will continue to accrue, expand, and/or increase. The public interest, convenience, health, welfare, and safety require neighborhood and community park and recreational facilities must be provided for the enhancement of the quality of life of the City's residents. The public interest requires three acres of community park or recreational facilities for each 1,000 persons within the City shall be provided and maintained for community parks and recreational purposes. There continues to be a deficiency in the City's community park and recreational facilities and land because the requisite three acres per 1,000 persons is not provided. This deficiency is caused by residential construction without adequate community park and recreational facilities and land for residents. Therefore, the development of new and rehabilitation of existing community parks and recreational facilities should be financed by applicants for developments which are served by public recreational facilities. The fee promotes the general welfare by requiring all developers of residential units to pay a share of the cost of developing a new, and rehabilitating existing, community park and recreational facilities which continue to serve the residents of the development. All new residential developments of more than one unit, and addition of one or more units to an existing residential development, shall be subject to the park dedication requirement, or payment of fees in lieu thereof, established by CCMC Subchapter 15.06.310.

**(C)** Identify all sources and amounts of funding anticipated to complete financing in incomplete improvements identified in paragraph (2) of subdivision (a); and **(D)** Identify the approximate date on which the funding referred to in item C is expected to be deposited in the appropriate account or fund.
