

Vaccination Requirement for Employees

Beginning November 29, 2021, the City of Culver City requires on-site employees of food & beverage establishments, gyms & fitness studios, entertainment & recreation venues, personal care establishments, and outdoor large events to provide their employers with proof of full vaccination for COVID-19.

On-site employees may be exempt from the vaccination requirements if they are declining vaccination based on a sincerely held religious belief or for qualifying medical reasons with a written statement from a physician, nurse practitioner or other licensed medical professional practicing under the license of a physician. Approved exempt employees must (1) test for COVID-19 at least once per week with either a PCR or antigen test and (2) wear a well-fitting mask at all times while at work.
