Examples of approved seating arrangements within the allowable occupancy
(Each square is 6”x 6”)

Barriers must be made of impermeable, cleanable, and durable materials that can be frequently cleaned and sanitized. Barriers must provide at least six-foot high barrier and must be installed per fire and building codes so as to not interfere with the ventilation or fire protection systems. Barriers must provide 30 inches above the table and other dimensions noted in diagrams.

![Diagram 1](image1)

**Diagram 1**
- Side by side no barrier
  - 4 feet between tables, edge to table edge
  - Distance between guests is 6 feet, center of chair
  - This applies to banquet seating
  - This also applies to counter seating
- 4 Feet
- 6 Feet

![Diagram 2](image2)

**Diagram 2**
- Side by side with barrier
  - 1 foot between tables, edge to edge
  - Barrier - extends 18 inches past end of table
  - For counter seating, with barrier no spacing req
  - barrier must extend into the counter 18 inches

![Diagram 3](image3)

**Diagram 3**
- "Perpendicular" Seating, no barrier
  - 4.5 feet between tables, edge to table edge
  - Distance between guests is 6 feet, center of chair
  - This also applies to counter seating

![Diagram 4](image4)
