The urban forest offers important benefits to the city.

Problems or Questions?

Please report any problems or questions to the City of Clovis, Department of Transportation. This includes tree trimming, yard waste pickup, and pothole repairs.

For more information, please visit the City of Clovis website at www.cityofclovis.ca.gov or call 559-724-5500.

Drainage:

Proper drainage is important to prevent flooding and erosion. If you notice any drainage issues, please report them to the City of Clovis.

Watering:

Properly watering trees is important to their health. Please water trees during the summer months, especially during dry periods.

Care for a parkway tree:

1. Trim branches that are blocking walkways or driveways.
2. Prune dead or diseased branches.
3. Water trees during dry periods.
4. Mulch around the base of the tree to help retain moisture.

Trees that are located in the parkway (the portion of the street right-of-way between the curb and the sidewalk) are owned and maintained by the City of Clovis. However, residents can play an important role in keeping parkway trees healthy. This sheet offers a summary of key information about caring for parkway trees.

Other planting in the parkway:

Plants in the parkway must follow certain guidelines to support the health of the pathway.

STAKES:

The soil must be 24" below the surface.

TREES:

Proper planning is essential to ensure the health of parkway trees.

GROWTH:

Trees should be spaced at least 24" apart to allow for proper growth.

WATERING:

Water trees during the summer months, especially during dry periods.

MULCH:

Mulch around the base of the tree to help retain moisture.

ATTACHMENTS:

Attachments are not allowed on the tree trunk.

RECYCLING:

Recycling is an important part of maintaining a healthy environment.

TREES:

Trees are an important part of our environment.

PROTECTION:

Protect trees from damage by trimming branches that are blocking walkways or driveways.

APPENDIX B - MAINTENANCE TIPS FOR PARKWAY TREES

CARING FOR A PARKWAY TREE

1. Trim branches that are blocking walkways or driveways.
2. Prune dead or diseased branches.
3. Water trees during the summer months, especially during dry periods.
4. Mulch around the base of the tree to help retain moisture.
