16" break-out line in canopy will have to be field verified during installation for protection of existing streets trees. Any pruning will need to be done with approval of city arborist. Trees owned by the City may not be trimmed by anyone other than City staff unless a permit is obtained first. To obtain a permit to have your City tree trimmed by a qualified and insured arborist, contact the Tree Maintenance Division at (310) 253-4424.
